PROFILE

Computer science graduate interested in software development and data: exploratory analysis, relational databases and presenting results to non-technical audiences. I recently completed a three-month end-of-studies internship, where I built a conversational agent that queries an analytics API in natural language.

PROFESSIONAL EXPERIENCE

AI Agents Intern (LangChain) — Scalnyx Feb – May 2026 · 3 months
ScalTerminal — conversational interface to the PROJECTOR analytics API

- Built a ReAct agent that interprets questions in natural language, translates them into the right sequence of REST API calls, and presents the returned results in readable form.
- Generated the agent's tools automatically from the API's OpenAPI specification, so new modules are picked up at runtime without changing the code.
- Designed a 30-question benchmark covering simple, multi-step and out-of-scope questions, and implemented a second architecture (LangGraph Supervisor with specialised sub-agents) to compare accuracy, latency and cost before recommending one.
- Delivered a tested codebase with conversational memory, bilingual FR/EN CLI and Streamlit interfaces, and full technical and user documentation.

Python · LangChain · LangGraph · Streamlit · pytest · REST / OpenAPI · Git

Front Desk & Operations Assistant — Djerba Sans Vis-à-Vis, Djerba, Tunisia 2023 – present
Bookings, client records, guest relations and day-to-day logistics, handled autonomously during seasonal peaks.

Private Mathematics Tutor — Freelance 2020 – 2022
Secondary-school students; explanations adapted to each level, with progress tracked over time.

PROJECTS

Nutr'Aissya — nutrition and wellness platform 2026
Full-stack academic project: session-based authentication with hashed passwords, user profiles and tracking history, articles with favourites and cart, and an admin panel for content and user management, over a six-table relational schema.
PHP · MySQL · JavaScript · HTML / CSS

Anime Recommender — TF-IDF and semantic embeddings 2025
Content-based recommender over a 17k-title catalogue, with a reproducible cleaning pipeline, approximate title matching and a Streamlit interface comparing lexical and semantic similarity side by side.
Python · scikit-learn · pandas · Streamlit

Titanic Survival Analysis — end-to-end EDA and classification 2026
Graded data science assignment: missing-value strategy, ordinal and one-hot encoding, correlation and segmentation analysis identifying sex and ticket class as the strongest survival factors, then a logistic regression baseline and an analysis of where its errors came from.
pandas · NumPy · seaborn · matplotlib · scikit-learn

EDUCATION

Licence — Bachelor of Science (B.Sc.), Software Engineering and Information Systems 2023 – 2026
Université Internationale de Tunis — graduated September 2026
Relevant coursework: data science, machine learning, database engineering, data warehousing, inferential probability and statistics, big data frameworks, graphs and optimisation.
End-of-studies project (ScalTerminal, Scalnyx internship): 18.5/20, *mention Excellent*.
Year averages: 15.16/20 (2nd year, *mention Bien*) · 15.63/20 (3rd year, first semester).

PASS — first year of health sciences, Université Paris Cité 2022 – 2023
Baccalauréat — Mathematics and Physics-Chemistry, Advanced Mathematics option 2022
Lycée CNED — mention Assez Bien

TECHNICAL SKILLS

Data: pandas, NumPy, exploratory data analysis, descriptive and inferential statistics, correlation analysis, data cleaning and encoding
Databases: SQL, PL/SQL, MySQL, NoSQL, data warehousing
Languages: Python, Java (OOP), PHP, JavaScript, HTML/CSS
AI & ML: LangChain, LangGraph, ReAct agents, prompt engineering, scikit-learn
Visualisation & tools: matplotlib, seaborn, Streamlit, Git, pytest, REST / OpenAPI, Agile (Scrum)

LANGUAGES & TRAINING

French (native) · English: TOEFL iBT 90/120 (May 2026) · Arabic (conversational)
SAP Dual Study Program: Solving Business Problems using SAP's Generative AI Hub, participation diploma (Nov – Dec 2025)
